Volunteer Experience

ETHxperience   Aug 2022

Participation as a volunteer in the largest side event in the ETHLatam 2022. Help in the content creation for twitter

About

Passionate about technology, science and innovation. I have a background in the biotechnology's field, now I am dabbling to the IT world, I trained as a Full Stack Developer and I am strongly oriented to Frontend, Web3 development and UI design. I am the type of person who seizes every opportunity to learn something new.

Projects - Academic Experience

Llamas Finance 🏆 Hackathon Winning Project

Frontend Developer | Chainlink Spring 2022 Hackathon | May 2022

Participation in an agile development team where I worked on the design and the frontend of this project. We wanted to fix the broken annuity industry by proving how smart contracts are the solution to fixed annuities. A fixed annuity is a contract between you and an insurance provider. It can act as a safe place for cash to accumulate interest tax deferred. You pay a lump sum of income, and in exchange, the insurance provider guarantees your principal plus a minimum interest rate fixed over a multi-year time horizon.

Celominder

Full Stack Developer | Platzi's CELO Solidity Dev Program | June 2022

HabitTracker created for Platzi's CELO Solidity Dev Program. The idea is to generate an own economic incentive so that the user is more motivated to acquire new habits.

Experience

SoyHabitue

Frontend Developer | June 2022 - Present

Habitué is a startup that helps you digitize your business to sell online, without commissions. I work as a Frontend developer in the development of a fully functional Dashboard for business management, branches and customer orders.

SoyHenry
