Volunteer Experience

ETHxperience   Aug 2022

I was a volunteer in the most significant side event of ETHLatam 2022. I helped with the creation of content for social networks.

LABITCONF   Nov 2022

Helping to organize a group of volunteers, finding speakers, and addressing attendees in the section of the stands.

About

Passionate about technology, science and innovation. I have a biotechnology background, and now I am dabbling in the IT world. I was trained as a full stack developer, and I am strongly oriented to Frontend development and UI design. I seize every opportunity to learn something new.

Projects - Academic Experience

Llamas Finance 🏆 Hackathon Winning Project

Frontend Developer | Chainlink Spring 2022 Hackathon | May 2022

I was part of an agile development team where I worked on this project's design and frontend. We wanted to fix the broken annuity industry by proving how smart contracts are the solution to fixed annuities. A fixed annuity is a contract between someone and an insurance provider. It can be a safe place for cash to accumulate deferred interest tax. You pay a lump sum of income, and the insurance provider guarantees your principal plus a minimum interest rate fixed over a multi-year time horizon.

Safe Travel 🏆 Winners of the "Originality" category

Frontend Developer | AI Code Fest by Globant | June 2023

I collaborated with the competitive TechSquat team to develop an innovative solution addressing climate issues using Artificial Intelligence. Our project was honored with the award for the most original and comprehensive proposal.

Experience

Synergy Agency

Full Stack Developer | Dec 2023 - Present

I work as a Full Stack Developer, creating custom solutions for clients and utilizing tools enhanced with AI. We assist businesses with effective solutions to streamline their internal processes by incorporating automation systems and chatbots embedded with Artificial Intelligence.

PideDirecto

Frontend Developer | Feb 2023 - Sept 2023

I work as a Frontend developer in the development of the Point of Sale for business management improving operational efficiency. PideDirecto allows you to manage your entire business in a single system to simplify your operation and increase your sales.

Education

CS50's Introduction to Computer Science

CS50x | Aug 2023 - Dec 2023

In this Harvard course, I mastered core computer science skills including C, Python, data structures and algorithms, culminating in a final project.

Full Stack Web Developer

HENRY Bootcamp | Aug 2021 - Nov 2021

+ 800hs. of full-time training in current web development technologies, dynamics of Pair Programming and soft skills boost.
